

Locks And Keys

Soulsister

Out of our window sits the station
You hate the sound of rumbling trains
But inside a pilot light is burning
I want to ignite a bigger flame

How will I know you'll be there
How will I know you'll be there

All you want is locks and keys
When you're talking about security
Locks and keys
That'll keep the world outside

How can we face another winter ?
You think there's safety in the warmth
But I know good weather will teach you nothing
All of the lessons are in the storm

How will I know you'll be there
How will I know you'll be there

All you want is locks and keys
When you're talking about security
Locks and keys
That'll keep the world outside

Locks and keys
When you're talking about security
As long as you got locks and keys
There's always some plac' good to hide

What are you hidin from me
Underneath your skin ?
What kind of force will it take
Before someone breaks in ?

How will I know you'll be there
How will I know you'll be there

All you want is locks and keys
When you're talking about security
Locks and keys
That'll keep the world outside

Locks and keys
When you're talking about security
As long as you got locks and keys
There's always some plac' good to hide
