

# Black Rain

Soundgarden

If I could hug my love, could I try  
For your wings to cover me and let them fold  
Half alive I hurt the most brilliant lie  
Sleepless eyes, close the light  
And rest your mind while you burn

Can't stutter when you're talking with your eyes  
By cutting out your tongue you save face  
Feeding on the blood lets running from a big day

Cry on black rain, cry on black rain  
Cry on black rain

If I could hug my love could I try  
for your wings to cover me unless I fall  
Sleepless eyes, close the light  
And rest your mind while you burn

You can't stutter when you're talking with your eyes  
By cutting out your tongue you save face  
Feeding on the blood lets running from a big day

Cry on black rain, Cry on black rain  
Cry on black rain

You can't stutter when you're talking with your eyes  
By cutting out your tongue you save face  
Feeding on the blood lets running from a big day
