

Subway Signs

Southpaw

Subway sings with me
All those subway melodies
Half of our lives spent underground
Listening to the subway sound
Subway moves and i stand still
Looking for a space to fill
Fill up with my flesh and bones
So many faces but i'm all alone
Escalator - navigator
It's a human calculator
See me standing on the platform
With the dull look as my uniform
Watching other people frown
Waiting for the subway sound
Every day it's always the same
Trying to catch that god damned train
