

## Abort

### Space Eater

Send in the task force  
And give them no remorse  
Surprise night assault will cast away their dreams  
Silence is our land. To infiltrate the land  
Behind enemy lines, divided into teams

Advance from river banks  
Strong moral is in our ranks  
Hostile ground might be covered with many traps  
The path is clear ahead  
And moon is full and red  
Slowly approaching while minding our every step

Mission in jeopardy  
Expecting what will be  
Are we all alone or surrounded by enemy

ABORT x4

Abort and quick retreat  
To avoid full defeat  
Air support is missing but there is no time to waste  
Nothing to pick or choose  
All hell's broken loose  
Dropping one by one, now we must make haste

Mission in jeopardy  
Expecting what will be  
We are all alone or surrounded by enemy

ABORT x8

We're returning the fire and taking the blows  
From out of nowhere hits being thrown  
Pushed back to river, the crossing to hell  
Total disorder, every man for himself

No one is left to command  
We've come to our fiery end  
Jungle burns, blood being spilled  
Completely aborted, objectives have not been fulfilled
