

Dream. Catch. Her.

Sparks The Rescue

This dream catcher is the last thing she'll see
Before she sleeps
I spun a web where I tried to eat
Every ghost that haunts her
She comes around says her hearts working double time
She's punching in and punching out of my mind

Try and leave
What is it to me?
She's out the window
Hell if I know
Why she just can't bother sleep

The pacific coast was the first thing I saw
She's still sleeping on
At last it talks putting on her mind
Oh why do I even try
When? she comes around my heart beats in half time
She's the chemical that affects my every rhyme

Try and leave
What is it to me?
She's out the window
Hell if I know
Why the hearts not guaranteed

And I stood at the end of her street
Watched the boy I knew succumb to defeat
If only praying knees could bring her home

She was worth her weight in gold
But the price has gone up I'm told

So I wore her out like a necklace
It turned my skin green, I finally reacted
And oh I thought I had her so long

Try and leave
What is it to me?
She's out the window
Hell if I know
Why her love it seems to flee

And I stood at the end of her street
Watched the boy I knew succumb to defeat
If only praying knees could bring her home
