

What Happened To The First Time

Spiritfall

What happened to the first time
You left me in a hole
Your words are something that can hypnotize
I'm thinking that I want you
I want you to see through
What happened to the first time
That I wanted to be with you

So why do you always take a part of me
Search yourself find what you're looking for
Two can play and you're losing the game
The time will come and I will leave you all alone

Now you start to crawl back
Your digging deeper down
You need to see the error of your ways
My heart is not an object
A thing you can beat down
Your promise is a mirror
That you break when I'm around

So why do you always take a part of me
Search yourself find what you're looking for
Two can play and you're losing the game
The time will come and I will leave you all alone

Now you start to crawl back your digging deeper down
Now you start to crawl back your digging deeper down
Two can play at this game but I don't care anymore
Two can play at this game but I don't care anymore

So why do you always take a part of me?
Search yourself find what you're looking for
Two can play and you're losing the game
The time will come and I will leave you all alone
Leave you all alone
