Don't Look In Their Eyes

Oh no, go get your guns We'll all fight like cowboys and pray like nuns Then we'll dance around the open flames If it gets too hot then we'll have no shame No shame

And you say we talk to much Cause nothing changes, nothing changes [mumble] So we don't talk enough Cause nothing changes, nothing changes, and no Oh Oh Oh Oh And no no

So wait here, sound the alarms Throw up your arms We've brought the entire army and we're starving So don't try Anything smart There's plenty of ammunition and we've got our guard

Look now he's on the run Well I'm glad he tried, it's much more fun If we chase until the sun goes down We can take him out with no one else around No one else around No one else around No oh Oh no no

So wait here, sound the alarms Throw up your arms We've brought the entire army and we're starving So don't try Anything smart There's plenty of ammunition and we've got our guard

Stick around I've got a hunch We'll bomb this town and stop for lunch And never, Nevermind those awful cries It's not as real if you don't look in their eyes Don't look in their eyes Oh no Oh no no

So wait here, sound the alarms Throw up your arms We've brought the entire army and we're starving So don't try Anything smart There's plenty of ammunition and we've got our guard Don't look in their eyes Don't look in their eyes Oh no Don't look in their eyes Don't look in their eyes Don't look in their eyes

Stabilo
