## Just Go

I'm kinda numb It's so distorted You left me here with this damage that you've caused My tortured faces Those fucked up places In my memories none of them I've lost, but... I haven't been here long enough to know Everytime I feel this I just lose control Such a cancer on the face of everything that's beautiful I wish that this would just go, go. It's kinda sick I feel so dirty I'm kinda tragic kinda insecure But I know that I'm the only One that can fix whatever's wrong I'm sure, but... I haven't been here long enough to know Everytime I feel this I just lose control Such a cancer on the face of everything that's beautiful I wish that this would just go, go. I feel so alone From all I've become I'll take you down I'll feel so down I'm water while you drown You're lifted while I'm down I'm cancer in your womb I'm the needle in your spoon, but... I haven't been here long enough to know Everytime I feel this I just lose control Such a cancer on the face of everything that's beautiful I wish that this would just go, go.

Just Just Just Just go Go All these fucking lies (3x) All your fucking lies (3x)

## Staind
