

Light of the World

Starfield

I know that there will come a day
We're all together in that place
But until then we gotta get along
Divided we're weak, as one we're strong
So everybody grab a hand
A house divided cannot stand
We can't show his love until
We're a shining city on a hill

If we all just come together, let our hearts collide

Then maybe we'll find, that the Light of the world will shine
to the depths of the darkest night
That the Light of the world will shine through us.
And maybe we'll see by our love that the world believes
and the captives will be set free
That the light of the world will shine through us.

We're the salt and we're the light
A blazing fire in the night
Burning for the world to see
Burning that they might believe
So let this fire in you burn bright
Wave the flag and join the fight
A revolution is at hand, let's learn to love our fellow man

If we all just come together, let our hearts collide
If as brothers and as sisters, we would unify

Then maybe we'll find, that the Light of the world will shine
to the depths of the darkest night
That the Light of the world will shine through us.
And maybe we'll see by our love that the world believes
and the captives will be set free
That the light of the world will shine through us.

Let it shine to the nations, let it cover the Earth
Through our lips as we worship, and our hands as we serve

[omit the 3rd chorus]

The light of the world will shine
The light of the world will shine
The light of the world will shine
The light of the world will shine
