

Hesitate

Stars Go Dim

The moment is here, the words are hanging off your lips
There's nothing to fear, just let them cry out like tears
It's so obvious, it's plain to see, it's written all over your face
All there's left to do is say I do, then we can spend the rest of our
days (together)

So give me all you got now, say what you need to say
Don't you hesitate
Show exactly how you feel and I'll be sure to do the same
I won't hesitate
We can make this night last forever
We both know we're meant to be together
Give me all you got now, say what you need to say
Don't you hesitate, hesitate

We might never know just how good this life could ever be
If we never show what's behind our false identities
Well we can go ahead and make believe that we don't feel anything
Or we can go ahead and lose it all but gain back everything
So what are you waiting for?

So give me all you got now, say what you need to say
Don't you hesitate
Show exactly how you feel and I'll be sure to do the same
I won't hesitate
We can make this night last forever
We both know we're meant to be together
Give me all you got now, say what you need to say
Don't you hesitate, hesitate

We can move on with the rest of our lives
Never look back or question why
We can make up for our lost time
We can come together, baby give us, just give us a try

Give me all you got now, say what you need to say
Don't you hesitate
Show exactly how you feel, I know what we have is real, together we a
lways will
Don't hesitate, yeah

Give me all you got now, say what you need to say
Don't you hesitate
Show exactly how you feel and I'll be sure to do the same
I won't hesitate
We can make this night last forever
We both know we're meant to be together
Give me all you got now, say what you need to say
Don't you hesitate, hey
I won't hesitate
