

## Morning Star

## Stars Go Dim

You give me a glimpse of your morning light  
When I can't find my way  
You let me begin again, a blazing fire  
Burning through the darkest days

You always bring the silver lining  
When hopes like a desperate cry  
You're coming like a flash of lightning  
Now I can see it

There's a new horizon on the sky  
I feel you calling me  
See the shadows only prove your light  
Is still surrounding me

You give me a glimpse of your morning light  
When I can't find my way  
You let me begin again, a blazing fire  
Burning through the darkest days  
You show me forever your with me  
Around me  
I'm never 'lone  
You give me a glimpse of your mercy's light  
Breaking through the sky  
My bright and morning star  
My bright and morning star

You always bring a new beginning  
The hope of a second chance  
With grace that's a gift unending  
Now I can see it

There's a new horizon on the sky  
I feel you calling me  
See the shadows only prove your light  
Is still surrounding me

You give me a glimpse of your morning light  
When I can't find my way  
You let me begin again, a blazing fire  
Burning through the darkest days  
You show me forever your with me  
Around me  
I'm never 'lone  
You give me a glimpse of your mercy's light  
Breaking through the sky  
My bright and morning star  
My bright and morning star

Nothing else can shine with the light that never fades  
Nothing in the world is gonna pull me away  
I feel it in my bones, now forever I'll say  
You're where I belong

Nothing else can shine with the light that never fades  
Nothing in the world is gonna pull me away  
I feel it in my bones, now forever I'll say

You're where I belong

You give me a glimpse of your morning light  
When I can't find my way  
You let me begin again, a blazing fire  
Burning through the darkest days

You give me a glimpse of your morning light  
When I can't find my way  
You let me begin again, a blazing fire  
Burning through the darkest days  
You show me forever your with me  
Around me  
I'm never 'lone  
You give me a glimpse of your mercy's light  
Breaking through the sky  
My bright and morning star  
My bright and morning star
