

# FAULTLINE

Starset

First you gotta know  
How to play the victim  
Hate to tell you so  
But you repeat the symptoms  
Like an aftershock  
And I only want to make it stop

But you make it stronger as it grows  
Revel in the friction  
Stop before you blow or damage our division  
No I'm not too shocked  
But I only want to make it stop

Got me shaking at the sight, oh  
Got me quaking in my mind oh  
You're tripping over every fault of mine  
You're breaking open every single time  
It's never black and white, no  
Going seismic out of spite, oh  
I never know if it's your fault or mine  
You're breaking open every single time  
Faultline

Falling off the charts  
Burning all your bridges  
You don't wear a scar while I'm the one in stitches  
And I don't know why you point the finger every time

Got me shaking at the sight, oh  
Got me quaking in my mind oh  
You're tripping over every fault of mine  
You're breaking open every single time  
It's never black and white, no  
Going seismic out of spite, oh  
I never know if it's your fault or mine  
You're breaking open every single time  
Faultline

When it's gotta end whatcha gonna say?  
You been seeing red  
And there's no one left to blame  
When it's gotta end whatcha gonna say?  
You been seeing red  
And there's no one left to blame

Got me shaking at the sight, oh  
Got me quaking in my mind oh  
You're tripping over every fault of mine  
You're breaking open every single time  
It's never black and white, no  
Going seismic out of spite, oh  
I never know if it's your fault or mine  
You're breaking open every single time  
Faultline  
Faultline  
Faultline  
Faultline
