

SYMBIOTIC

Starset

Torn into pieces
I was seeking
What could bring me back to life
And I swore there were voices
Saying stop pretending
You will never feel alive
And then you came
It was like some synergy
Had fallen in place
Of everything missing in me

Shine your love
Show your light
Pull me out from the endless night
It's something cosmic (something cosmic)
It's symbiotic (it's symbiotic)
Take my hate
Take my fight
Take away all the pain I hide
'Cause I can't stop it (I can't stop it)
It's symbiotic (it's symbiotic)

Send me a lifeline
When I don't seem
To be finding
Better days
Lend me your daylight
And when you're
Trapped inside the rain
I'll do the same

Something so strange
Every time you walk away
The energy fades
Until you come back to me

Shine your love
Show your light
Pull me out from the endless night
It's something cosmic (something cosmic)
It's symbiotic (it's symbiotic)
Take my hate
Take my fight
Take away all the pain I hide
'Cause I can't stop it (I can't stop it)
It's symbiotic (it's symbiotic)

Symbiotic
Symbiotic

So shine
My ship is adrift in the night
Need the flame only you have inside
When I'm stuck out on the darkest side
Only you reignite me

Shine your love

Show your light
Pull me out from the endless night
It's something cosmic
It's symbiotic
Take my hate
Take my fight
Take away all the pain I hide
'Cause I can't stop it (I can't stop it)
It's symbiotic (it's symbiotic)

Shine your love
Show your light
Pull me out from the endless night
It's something cosmic (something cosmic)
It's symbiotic (it's symbiotic)
Take my hate
Take my fight
Take away all the pain I hide
'Cause I can't stop it
It's symbiotic
