

Commander Cosmo

Steam Powered Giraffe

You told me
You'd h-...

Burning in the stratosphere
Looks like there's no place to run
I know that I have a heart
It burns like a million suns

Commander Walter, come in
We've got the Cosmo's distress signal
You were hit by an unknown force
An energy with Earth as it's source
What's your status?
This is flight Engineer Dwight
Ground Control, do you read?
The explosion, it hit Walter! Hit him right in the chest
I'm losing air, I'm spinning out
High above the Earth
I don't think I can hold on much longer

The story says he saved Dwight
Filled his lungs with air
And he returned him through the atmosphere without a bruise, or scrape, or tear
Commander Cosmo Saves The Day
A hero overnight
He rocketed into outer space just by thinking about flight
There was no explanation how he did what he did.
He unearthed special powers from his deep cosmic id
He could eat thirty moons and still eat thirty-five more.
And his super space muscles were hard to ignore.
Commander Cosmo™ save us!
It'll never be the same
The star streak of justice flies
Just call the commander's name

Commander Cosmo™ save us!
Save us all from Mars
The martians melted Parliament and ate all of our cars.
Black hole strong and lightspeed quick
Singularity Concussive Kicks™
Comet Crystalline Ether Form™
And eyes that burn like a cosmic storm

Mister Cosmo, you're the best. Hello, my name is Sam.
I bought your t-shirt and your lunchbox - the one with the sweet hologram.
If you could sign my baseball bat, gosh that would be swell
And if you've got some extra time, could you send those spider demons back to hell?
Commander Cosmo™ save us!
Save us from Doctor Blight™
With your helmet made from UV rays and that space cape of starlight.
Flying saucers, sky sharks, the Starblood Beast™ all could not compare.
Even the space pterodactyls didn't stand a chance, Commander Cosmo killed them all with his Sun Beam Stare™

I just can't bare to wade

Through the infinite decades
Seein' all those pretty smiles
They'll burn, they'll burn

Burning like a million suns
I know where I'm going to run
Straight into the heart so far
deep within the darkest star

Commander Walter loved her
But the ring, it came too late
Decades flew by but she would cherish him
No matter his final fate.
Commander Walter, save him
Save him in your heart
Find peace inside the black of the dark Necrostar
Commander Cosmo, save us
it'll never be the same
There's nothing left to save us, and the vice is what to blame

Commander Cosmo, save us
Save us from the end
What will we do when the cosmos quake and the gods above descend?
