

It's Cosmic

Steam Powered Giraffe

Don't tell me that it's cosmic
I know it's cosmic, oh yeah

Illuminating light pours from our eyes
and lights up the end of the day when we've
burned the candle at both ends
and we need somebody to pick up and carry us

home is anywhere we reside in our minds
and make us smile just by thinking of
us is a pretty strong word that's why we
use it when we include us in everything

Oh it's cosmic
Oh so it's cosmic
The planets pass through the starshine

The moons start to shiver
The cosmos quiver
This love beams through space and time

Don't tell me that it's cosmic
I know it's cosmic, oh yeah
It's said we're written in the stars
and that's the truth by far, I know

There's space across the galaxy
enough for you and me to be alone
They say that when the stars align
our two hearts combine, whoa-oh

Interstellar flight could take us
far but when would we return and touch back down on
Earth is where we were born
and is where we will live and die all together in our

Arms is where we feel safe
and there's a universe out there to inspire our
Dreams pour from our minds
and when they sync up boy is it anything but awful

Oh it's cosmic
Oh so cosmic
The planets pass through the starshine

The moons start to shiver
The cosmos quiver
This love beams through space and time

Don't tell me that it's cosmic
I know it's cosmic, oh yeah

It's said we're written in the stars
and that's the truth by far, I know

There's space around the galaxy
enough for you and me to be alone

They say that when the stars align
our two hearts combine, whoa-oh

Don't tell me that it's cosmic (it's cosmic)
It's said we're written in the stars (it's cosmic)
There's space around the galaxy (it's cosmic)
They say that when the stars align (it's cosmic)
