# Good Is Me

**Stereolab**

```
I am good, therefore good is me
He is not me therefore he's not good

I am good, therefore good is me
He's not me therefore he's not good

I am good, therefore good is me
He is not me therefore he is not good

Our norms are good
Good are our norms
Theirs aren't ours
Therefore are not good

Our God is true
True is our God
Their God's not ours
So is not true

Impossible to consider
Reality of the other
Other people's institutions
Not better or worse just other

I am good, therefore good is me
He's not me, therefore he's not good
```
