Extinction Blues

Steve Lukather

World of fear Dying sun Amber tears Wars to be won World grown old Lost to man All alone All but forgotten

Same extinction blues You've heard before the Same old news

You and I Last chance Age of ice Frozen romance Time repeats Death to life Heartbeats Save us tonight

I got the same extinction blues The same old news Extinction blues

It's great to be optimistic And look at the world Through rose colored eyes Tell you what not to wish for Mountains don't move When you want them to

Same extinction blues You've heard before The same old news Extinction blues
