

# Ride This Rocket

Steve Wariner

Hey, Hey, what planet are we on  
Everything seems wrong  
Hey Hey tired of trying to survive  
Living half alive.

I'm ready to ride this rocket baby come with me  
To the other side of heaven our own galaxy  
A million miles from anywhere  
All we need is out of here  
Let's go put some stardust in our pocket  
Ready to ride this rocket.

Someday wrong will turn to right  
We will win this fight  
But today all I wanna do  
Is just get away with you.

I'm ready to ride this rocket baby come with me  
To the other side of heaven our own galaxy  
A million miles from anywhere  
All we need is out of here  
Let's go put some stardust in our pocket  
Ready to ride this rocket.

Turbo on this baby blue corvette  
Red wine a blanket are you set  
Oh there ain't no way to stop it  
Are you ready to ride this rocket

Are you ready to ride this rocket baby come with me  
To the other side of heaven our own galaxy  
I'm choking in this atmosphere  
All we need is out of here  
Let's go put some stardust in our pocket  
Are you ready to ride this rocket...
