

Face To Face

Strangeways

You know it's wrong, you know it's right
No sight no sound, no black no white
I feel it now, but I need more
Please show me how, it was before

'Cause lately, there's been times in my life
I've seen through your eyes
And maybe, it's the world that I see
That I can't deny

Face to face
I've been waiting such a long time
In spite of the pain, I've found you again
In the heat of the night

Ya feel so bad, ya feel so good
Ya feel the fire, like I never could

'Cause lately, there's this voice in my mind
That's tellin' me why
I'm crazy, to hide from myself
And I can't deny

Face to face
I've been waiting such a long time
In spite of the pain, well I've found you again
In the heat of the night

Face to face
You've been looking for the wrong kind
Only to find, it's so hard to hide
The flame never dies

Face to face
I've been waiting such a long time
In spite of the pain, well I've found you again
In the heat of the night
Face to face

I've been waiting such a long time
Face to face
In the heat of the night
Face to face
