

## Full Moon

Stratovarius

Shining there in the sky light our way across the land  
Black clouds in front of your face fading into the haze  
In this prison of mine my soul lies in despair

My mind wanders through time tell me what is my crime  
What is behind velvet lips heart as cold as the ice  
In this prison of mine my soul lies in despair  
Won't you set me free now I have to leave
