## **Madness Strikes at Midnight**

## **Stratovarius**

He's crawling out from the asylum, no Under cover of the night Insanity of his crazy mind It's useless for you now to hide

Walking the streets, someone's in sight He's waiting for you in the night Hiding in the shadows Hiding in the alleys He's ready to kill tonight

So lock your doors and hide And pray your God 'Cause you're not alone

Years he spent in the cage They did not help him at all Now, today with the power of his rage He's slaughtering people tonight

Walking the streets someone's in sight He's waiting for you in the night Hiding in the shadows Hiding in the alleys He's ready to kill tonight

So lock your doors and hide And pray your God 'Cause you're not alone

Madness strikes at midnight Madness strikes at night

Madness strikes at midnight Madness strikes at night

So lock your doors and hide And pray your God 'Cause you're not alone

Madness strikes at midnight Madness strikes at night

Madness strikes at midnight Madness strikes at night

Madness strikes at midnight Madness strikes at night

Madness strikes at midnight Madness strikes at night
