Computer Eyes

Stream of Passion

Computer Eyes (Stream Of Passion Version)
Lost in a world created by man
I can't recall how it all began
Tell me who am I?
Tell me who am I?
Tell me who am I?
Fictional stars in lost galaxies
Synthetic dreams and false memories
Is it all a lie?
Is it all a lie?
Is it all a lie?
There is no escape
There is no way out of here
I'm locked in this universe
The real world will disappear
Where fantasy dies
You will see our dreams
Materialize
Computer eyes
Virtual reality – computer override
Actual fantasy – locked away inside
Am I no more than a program
An artificial dream?
A river of electrons flowing with the stream
A parallel dimension, battle simulations
Mind over matter, brain stimulation
I don't know if I exist, I think therefore I am
Without emotions I'm but a hologram
There is no escape
I'm locked in this universe
Where fantasy dies
Materialize
Computer eyes
There is no escape
There is no way out of here
I'm locked in this universe
The real world will disappear
Where fantasy dies
You will see our dreams
Materialize
Computer eyes
