

## Up To You

Subseven

Your own fault - it's new news  
To hear I blame this on you  
Just enjoy - it's your choice  
To see success in your shoes  
Smile or frown - up or down  
Can't let go of all your dreams  
Feel the heat - you never sleep  
But you can do more than it seems

I leave this up to you (must be up to you)  
To choose what you must do (through fire and the flames)  
I leave this up to you (must be up to you)  
To do what you should do

Where were you - I lost you  
Right beside you all the way  
I chose to - to quit you  
But you just threw dirt in my face  
Whine and shout - can't figure out  
"Circumstance" - is your excuse  
You lie around - I call you out  
You're so much more, son, than you choose
