

Took My Breath Away

Suburban Legends

How did I let you get away?
I opened my mouth and you backed away
I show you magic, let's ride the dragon
I make you uncomfortable
And damn you're banging
The silver bullet, gonna make you pull it
Already told my friends that we're getting down
You can't stand to have me around
My personality is bringing you down
No, I don't like the way that sounds
But I think you know...
You took my breath away
Is what the girls say
You took my breath away (She said)
You want my love you're gonna have to pay
You took my breath away
Every step she's pushing me away
Don't answer my calls so I'm hanging out
(Hanging out in front of your house tonight)
Some'ing needs to click to tell me that I'm being
creepy
But that ain't right, cuz I'm pretty sure she needs to
see me
Could you imagine a girl who'd slay the dragon
Is what they say when I wouldn't stay away
It's not a fake out, girl I came to make out
I'm pretty and harmless until I force my way to your
life
Fifty million ways I'm going to make you pay
When you finally answer my call you'll hear me say
Makes my heart hurt just to think of your face
Loving and other man in any other way
[Chorus 2 x2]
