

One Finger Salute

Suicidal Tendencies

The power of the sweat
The pain we won't forget
The worst is coming yet
But you know we'll be waiting for it

Stick your finger in the air
Wave it like you just don't care
Battle on another day
Give'em hell another way
Hurry up don't you wait
Prepare to take on all their hate
Rise on up you got to climb
Seize the moment, cause it's our time!

Stand tall and hold your head high
Raise your fist, middle finger, up to the sky
Our conviction you cannot dispute
Stand at attention
Here's your one finger salute!

Stick your finger in the air
This is how we show we care
Lies and pain and misery
Stop the self inflicted agony
Corruption and abuse of power
It's the tyranny of the hour
No better time, no other place
It's our fight, the human race

Stand tall and hold your head high
Raise your fist with your middle finger to the sky
We won't back down, you cannot dispute
We stand in contempt
One finger salute

Stick your finger in the air
Wave it like you just don't care
Stick your finger in the air
Stick your finger in the air

One finger salute
One finger salute
One finger salute
One finger salute

The power of the sweat
The pain we can't forget
The worst is coming yet
But we'll be ready for it
Get ready!

You think you're thinking, but your out of your mind
You got no vision, cause your morally blind
Can't fill our hearts when yours is hollow
You cannot lead cause we won't follow

One finger salute

The power of the sweat
One finger salute
The pain we won't forget
One finger salute
The worst is coming yet
So you better be ready for it!
