

Astrogen Nostalgia

Sunshine

one thing right
one thing wrong
what we wanted anymore
one thing left
one thing right
what we wanted from this night
one thing up
one thing down
what you see it's underground
one thing's up
one thing's down
one thing's down

getting tight
and getting strong
it's not easy anymore
one thing left
one thing right
what we wanted from this night
one thing up
one thing down
what you see it's underground
one step up
one step down
one step down

what we feel now
what we feel now
what we wanna feel now
it's wrong what we feel now
what we feel now

that's how every moment of my life it's getting painted
black is like a fever, we're living like we're fainted
i tried to piece the puzzle of every fucking day
wanna walk this way
you don't listen anyway
i close my eyes, hidden in the darkness of faith
you're the one who always makes it complicated
and pressures me with the issues i can't see
ignorance is bliss
i need exactly this

what we feel now
what we feel now
what we wanna feel now
it's wrong what we feel now
what we feel now

what we feel now
one thing wrong
what we wanted anymore

what we feel now
one thing left
one thing right
what we wanted from this night

what we feel now
one thing up
one thing down
what you see it's underground

what we feel now
one thing's up
one thing's down
one thing's down

what we feel now
what we feel now
what we feel now
what we feel now
what we feel now
what we feel now
what we feel now
what we feel now
