

The Night Is On Fire

Sunshine

i've been watching you dress in the morning
i know you wanted to quietly disappear
everything about you still surprises me
i could be right
i could be wrong
it could be me
what you wanna feel now
you gonna feel now
what you have to do it's just a relief
i know your skin is so light
and the sex is a fight
go on! go on! go on!

i'm so happy to hear that you've made it
it doesn't matter that we're living a lie
cracking jokes, getting drunk, throwing parties
we could be right
we could be wrong
we could be free
what you wanna feel now
you gonna feel now
what you have to do it's just a relief
i know your skin is so light
and the sex is a fight
go on! go on! go on!

confession tastes like a pretty slow death
night in the fire
don't f*** with the river
it's time to start thinking that we're living a lie
love could be cruel like a crimson curse
one night in the fire
don't f*** with the river

long days and nights, i start to lose it
what do i need to keep up this game we play?
long days and nights, i start to feel it
i try to run but i'm not as fast as they say
this is not a pop song
not even a love song
what you have to do is just a belief
i know your skin is so light
and the sex is a fight
go on! go on! go on!

confession tastes like a pretty slow death
night in the fire
don't f*** with the river
it's time to start thinking that we're living a lie
love could be cruel like a crimson curse
one night in the fire
don't f*** with the river

this is not a pop song
this is not a love song
this is not a death song
this is not a sex song

the night is on the fire
don't f*** with the river
don't f*** with the river
don't f*** with the river

the night is on the fire
don't f*** with the river
don't f*** with the river
