

Born Again

Sunstorm

You can't find love in this mess around you
You don't seem fine in all these lows
You can't control your desperation
If all you do is wasting time

You could have taken the best out of me
But you only chose for yourself
You might be coming right back to me
My heart will be ready to forgive

It's only love and only love
That can cure this world
And bring us back to life
Only love and only love
Can give us the power
To be born again

There's no way out if you look behind you
You can only worry 'bout tomorrow
You can't control everyone you want
My heart will be ready to forgive

It's only love and only love
That can cure this world
And bring us back to life
Only love and only love
Can give us the power
To be born again

It's only love and only love
That can cure this world
And bring us back to life
Only love and only love
Can give us the power
To be born again
