

Far from Over

Sunstorm

Destiny calls those who dare
The braver you act the deeper you get
Once meanings are lost the purpose collide
With what you are and where you wanna go

Can't wait for tomorrow
Be your future today
Don't chase any sorrow
Can't wash any sin away

Don't wait for the end to come again
You can't let it take over
Don't let the pain take that spark away
You're far from over

Stranded away far from the truth
In an island of lies and darker blue
Watching the sky turning black
Waiting for stars to lead your track

Can't wait for tomorrow
Be your future today
Don't chase any sorrow
Can't wash any sin away

Don't wait for the end to come again
You can't let it take over
Don't let the pain take that spark away
You're far from over

Don't wait for the end to come again
You can't let it take over
Don't let the pain take that spark away
You're far from over
