

Lighting The Way

Superdrag

I've been lighting the way
With bridges burning low now
I've been wasting the days
Like living's going out of style now

I've been up every night
Walking down the highway
If I can make things right
I'm gonna do it my way

Send it straight to you
Like you put a price on everything you do
Like a song that ain't worth singing

I've been hiding away
Waiting for disaster
I regret the delay
I wish I could've healed up faster

I've been up every night
Walking down the highway
If I can make things right
I'm gonna do it my way

Send it straight to you
Like you put a price on everything you do
Like a song that ain't worth singing
A thought that ain't worth thinking
I've gotta find something worth bringing back to you

Send it straight to you
Like you put a price on everything you do
Like a song that ain't worth singing
A thought that ain't worth thinking
I've gotta find something worth bringing back to you
To you

If I can make things right
I'm gonna do it my way
If I can make things right
I'm gonna do it my way

If I can make things right
If I can make things right
If I can make things right
If I can make things right

If I can make things right
If I can make things right
If I can make things right
