

# Love Like Blood

Sybreed

We must play our lives like soldiers in the field  
But life is short I'm running faster all the time  
Strength and beauty destined to decay  
So cut the rose in full bloom

Til the fearless come and the act is done  
A love like blood, a love like blood

Til the fearless come and the act is done  
A love like blood, a love like blood

Everyday through all frustration and despair  
Love and hate fight with burning hearts  
Til legends live and man is god again  
And self-preservation rules the day no more

Til the fearless come and the act is done  
A love like blood, a love like blood

Til the fearless come and the act is done  
A love like blood, a love like blood

Til the fearless come and the act is done  
A love like blood, a love like blood

Til the fearless come and the act is done  
A love like blood, a love like blood
