I think the stars are especially bright tonight And I love the way they shine Reflecting inside your eyes It's you and me forever That's what I know for sure My heart is here for you Just like an open door

I can't say in any better way Hard to explain What you mean to me

You're beautiful

And I can't find
Any better line
For design
Any better sing for
You're beautiful

I feel the sun
He's especially warm today
Well I guess you may
I guess the rain, go and come back another day

You know I love your smile But that's all I need for me And living my life with you, It's just like a fantasy

I can't say in any better way Hard to explain What you mean to me

You're beautiful

And I can't find
Any better line
For design
Any better sing for
You're beautiful

I can't say in any better way Hard to explain What you mean to me

You're beautiful
