

I Need You

Taj Jackson

Ohwwww

I get get confused from left and right
Cause I don't know where I supposed to be
I'm hopeing your gonna show me the light
So I'm trying following your lead, yes I am
Can you help me make sense, of this work called love
I'm so good I'm so wright
It's see that's enough is to much
If you say this is easy
Then explain why your leaving
Tell me what will you do, if I gave my heart to you

If I gave you my heart
Will you throw it away
When I need you
Tell me where do I start
When the finishline is so far away
Can't you see that I need you

I wanna be by your sun like a shadow
But I can't if your living in the dark
So I ask why you stay with me
Cause I'm not good if we're apart
See I need to make sense, of this work called love
The definition is you, cause your all I'm think off
They only way that I'm leaving
Is the air your breath in me
Hope you know what to do, when I give my heart to you

If I gave you my heart
Will you throw it away
When I need you
Tell me where do I start
When the finishline is so far away
Can't you see that I need you

When it rains it's pulls
That's when you did move
You know how I feel about yah
So open the door and be my best friend
And stay till the end
Please know that this is real
We promised that we (broke before?)

If I gave you my heart
Will you throw it away
When I need you
Tell me where do I start
When the finishline is so far away
Can't you see that I need you

Don't you see that I need you,
Ohhowwww
When the finishline is so far away
