

Seems so hard to get outta bed
I'd rather not see the light of day
But I can't sleep and my eyes are red
Never thought I would be going through this kind of pain
Ok I give up, please come back now
It's been too long and I'm starting to break down (oh oh)
Since you left there's a hole in what use to be my heart
We were so inseparable don't know why we fell apart
Girl your love was all that I had and now my life's outta control
So how, how do I get back to when things were simple
Check my messages cause you never know
You might call and say you wanna come home
People telling me that I should let you go
Don't try to call cause you changed the number to your phone
Girl I'm so confused (I'm so confused) it's so hard to like you
(yeah)
Don't make me say good-bye just tell me why
Baby where did you go (ooh)
I think I have a right to know
Since you left there's a hole in what use to be my heart (use to be my heart)
We were so inseparable don't know why we fell apart (why we fell apart)
Girl your love was all that I had and now my life's outta control
So how, how do I get back to when things were simple
So is this how it ends
We can't even be friends
No starting over again
It's not the way it's suppose to be
Girl it's too hard for me knowing you're the one I need
And I don't wanna think that you can live without me
Since you left there's a hole in what use to be my heart
We were so inseparable don't know why we fell apart
Girl your love was all that I had and now my life's outta control
So how, how do I get back to when things were simple
Since you left there's a hole in what use to be my heart
We were so inseparable don't know why we fell apart
Girl your love was all that I had and now my life's outta control
So how, how do I get back
Tell me how, how do I get back to when things were simple
