

# Like I Never Loved You at All

Take That

Where, where are the stars?  
The one that we used to call ours  
Can't imagine it now  
We used to laugh til we fell down

The secrets we had, now in the past  
From something to nothing, tell me

How did we lose our way?  
It's hard to remember, all that we shared  
Now we both have separate lives  
From lovers to strangers, now alone  
There's no one catching my fall  
No one to hear my call  
It's like I never loved you at all

Now you're so far away  
And I see our stars is fading  
One too many times  
Guess it just got tired of waiting around

The night that we thought, if these walls could talk  
From something to nothing, tell me

How did we lose our way?  
It's hard to remember, all that we shared  
Now we both have separate lives  
From lovers to strangers, now alone  
There's no one catching my fall  
No one to hear my call  
It's like I never loved you

So now does he give you love  
Oh, Is it only me now that's thinking of, what we had and what we were  
Oh, Did you ever care, baby was I ever there?

How did we lose our way?  
It's hard to remember, all that we shared  
Now we both have separate lives  
From lovers to strangers, now alone  
Tell me how, did we lose our way  
It's hard to remember, all that we've shared  
Now we both have separate lives  
From lovers to strangers, now alone

There's no one catching my fall  
No one to hear my call  
It's like I never loved you at all

It's like I never loved you at all [Repeat: x2]
