

## Die alone

Takida

Are you colder now, are you colder than the water?  
Is your heart alive, your heart is so much older?

When you will find out there will be no doubt  
There is no way back home  
Waiting for the day, it will come your way  
The greatest fear die alone

You're helpless now and you're about to fall  
You wanna change, yeah you want to remember it all  
It's darker now and you think you're all alone

And you will find out there will be no doubt  
There is no way back home  
Waiting for the day, will it come your way  
The greatest fear die alone

Moving closer let go  
Getting weaker and still you don't know  
Why tomorrow comes alone  
And now it's gone

Are we seeking life, are we feeding from pain?  
I can hear you cry, are you feeling the same?  
I can see it now you are leaving today

Are we seeking life, are we feeding from pain?  
I can hear you cry are you feeling the same?  
Swallow the pride  
Don't think of tomorrow, don't think of today  
Don't think of tomorrow, don't think of today  
Don't think of tomorrow, don't think of today
