

## Oblivion

### Tantrum Desire

Do you remember the truth without hesitation?  
Every little bit of our world  
Way back to the start, such a new sensation  
Never felt like it was over

You're oh all I could think of  
I know I don't wanna move on  
If time, time is a healer  
Then I, I want it forever

Take, take, take you for a ride  
Rewind everything if I could  
Nowhere to run but I'm stood  
Get me out of oblivion  
Take, take me home to the start  
There's something there that can help us  
So close but ever so far  
Get me out of oblivion

(All 2x)
