When I did "Anghellic" I was good and bad, straight confused Then an angel turned to Devil Boy when the Reperation blew Them demons had "Absolute Power" when I drug abused

So the angels searched for the "Vintage Tech" what they found was the love \boldsymbol{w} as through

Then an accident would happen that made life look necessary

So now receiving God, the angel was 'Everready'

But the 'Melancholy' strikes, the eleven angels mommy's life

So the 'Mizery' sat in the angels now becoming ice

As mom got ill and iller, when it hurts her he can feel her

To the strain of the pain made him vein there's no more angels straight up K ILLER!

My apologies, it's not very God of me, to go crazy and try to teach the whole world 'Sickology'

I was then split in two, back to the beginning view $\ \ \,$

Angel demon cause the killer showed me death was overdue

But I gotta live for my kids, all the evil stuff I did

Taught me to teach you, you can love them no matter how much sluts you did Or done, you met my demon back when I had that grudge

But I gotta let you know most of my spirit comes from up above

I'm mostly angel, and you know sometimes we fall

Living under God and I hope he's listening when I say I love you all!
