

Standing On the Edge of Time

Ten

Where should I start...
At the beginning lost in time
Oceans apart, missing you hand in mine
Wasting my time
Cause you're always on my mind,
Feeling so lonely,
If I could only, talk to you tonight

Here in my heart,
I'm being slowly torn apart
What can I do,
When I'm so far away from you?
I close my eyes and you're standing
By my side,
I feel like I'm falling,
Without a warning,
Calling you tonight

Midnight,
Standing on the edge of time
Moonlight
Love has been a friend of mine
You're my angel from above
You, I believe in
This light calls me
From another world
Insight, far beyond the cover, girl
You're my one and only love
Got to believe it...

Up in the sky...
The silent echoes of the night
Into the light
Out on our timeless flight
Hot to the touch,
Girl, I've wanted you so much
Reaching to hold you
Is coming true tonight

Midnight,
Standing on the edge of time
Moonlight
Love has been a friend of mine
You're my angel from above
You, I believe in
This light calls me
From another world
Insight, far beyond the cover, girl
You're my one and only love
Got to believe it...
