

Temple of Love

Ten

You can feed my fire in your temple of love
As the moon shines down in crescendos from above
Keep me up all night I can never get enough
Give me all you got, baby don't stop
Temple of love
Temple of love

Shooting stars, late at night,
Fall to earth, discharge the light
Slowly die, then 'gone forever'
You and I, burn so bright,
Star-crossed lovers, satellites,
Endless time is ours, together...

It's such a strong desire
Deep in my heart, I'm wired
As from the embers of love we climb
To ignite

You can feed my fire in your temple of love
As the moon shines down in crescendos from above
Keep me up all night I can never get enough
Give me all you got, baby don't stop
Temple of love...
Temple of love

Every hour, every day
You are just a breath away
I can't bear to be without you
You are all that I need,
You fulfil my fantasies
When I sleep I dream about you

It's such a strong desire
Deep in my heart, I'm wired
As from the embers of love we climb
To ignite

You can feed my fire in your temple of love
As the moon shines down in crescendos from above
Keep me up all night I can never get enough
Give me all you got, baby don't stop
Temple of love...
Temple of love
