

# Tourniquet

Tesseract

I'll wait for you  
Run wild and aspire  
Thrive, burn young fire  
When you say "fight back", our love won't tire  
Unweathered and untethered light

I promise you and I will see it through  
You lay dreaming  
No time to sleep as I begin to weep  
Life is fleeting  
I tighten fast inside your tourniquet  
Stop the bleeding  
Your tenderness, your softened skin  
All I needed

Your love is my tourniquet  
Learn to rise, contain the pressure  
This was supposed to be no miracle  
Bow down because I'm under pressure once again

I promise you, I promise you  
Take my strength  
I honor you with everything  
Take my strength  
I promise you (and I) will see it through  
(Am I dreaming?)  
The endless light you shine on me  
All I needed
