

Greenhouse Effect

Testament

Fools the ones who stray, the raw forest burns away
Know wat to believe, this is the air we breathe
So te world we know is dying slow in South America
Flames are burning down, all the trees to te ground

Time is running low, we can't stay no more
Wealth therse people see, fight for eternity
Lies they televise paid by their goverment
Tere on! It's lingers on
And they don't even care in they...

Seal te Planet's fate
Crimes tey perpetrate
Wasting precious land
It's time to take a stand

Our only hope to breathe again
To stop the madness closing in
What will we do when all is lost
Environmental holocaust.....repeat

Foes these people go, someone destroyed their home
Plagued with disease, left praying on teir kness
Laws protect the land, social justice in demand
Smoke it fills the air into te atmosphere
Now it's time to see a cycle of a tragedy
On! It lingers on, and they don't even care if they

Seal te Planet's fate
Crimes tey perpetrate
Wasting precious land
It's time to take a stand

Our only hope to breathe again
To stop the madness closing in
What will we do when all is lost
Environmental holocaust.....repeat
