

## Big Sleep

### The Acacia Strain

Oh wondrous deceiver  
You've made me a true believer  
Locked inside an empty room  
Enjoy your safety, enjoy your tomb  
The bottom is too high  
You've been sinking your entire life

I cringe every time I'm forced to say your name  
Today and yesterday will never be the same  
Fear is the difference between progress and change  
In death there is no pain, I turn the final page

I am the voice you hear just before you die  
No second chances, time to say goodbye  
Bite your tongue as I smile ear to ear  
Taste the iron in the air

Taste the iron in the air

Enjoy the big sleep  
You've gotten yourself elbow deep  
Close your eyes and grit your teeth  
You ruin everything

You ruin everything you touch  
The world is your enemy and I'm your fucking crutch  
One of these days you're all going to die  
And that will be the best day of my life

Your life is a joke  
Take a bunch of pills and choke  
What's dead is dead will always be  
You do not exist to me
