

True.

The Airborne Toxic Event

It sure seems clear to me
As far as I can see
How the highest life brought the lowest out of me
Eventually

You're the reassuring kind
You're never really off my mind
Don't know what it means but it's sure a damn good line
When you're running out of time

True... True... True... Blue

It was more than I could take
You got something that I can't fake
I fall down sometimes, I sh-sh-shiver and shake
It's so much worse when I'm awake

Because the truth is always wrong
And it's hard to face the dawn
When your days get short your nights get so damn long
So you just play along

True... True... True... Blue

It's true you were my best friend
We needed each other in the end
When there's nothing left to give
There's just some time that you can spend
You just tell me when
I know we'll be together then

I'll see you again
I'll see you again
I'll see you again
I'll see you again
And I'll see you again
I'll see you again
And I'll see you again
I'll see you again

True... True... True... Blue

And they say it's "dust to dust"
You don't want to face it but you must
I won't ever let go and that's one thing you can trust
I'll see you in the dust
I'll meet you in the dust
