

# Movin' On

The Angels

Only you can tell  
Only you can know me  
Only you can see what's going on  
Only you can choose  
Don't you try to own me  
Only you can know where I belong

I gave you trust you gave me nothing but pain  
It's in the air I breathe  
I can't keep wasting all my days and nights  
I can't keep trying to believe

I know what I want  
I've got to move on  
I've seen much better days  
You've been in my life too long  
It's time for us to go our separate ways  
You've been in my life too long

I can move the earth  
I can make the wind blow  
I can do anything at all  
I can firewalk  
I can make the tide turn  
Only you can see how far I fall

Now I wonder what the hell I'm gonna do  
I don't feel safe when you get close  
You got me lookin' at the sky for clues  
For the love that never shows

I know what I want  
I've got to move on  
I've seen much better days  
You've been in my life too long  
It's time for us to go our separate ways  
You've been in my life too long

Nothing ever changes 'till the change is made  
Nothing changes 'till the change is made, never changes  
Nothing ever changes 'till the change is made  
Nothing changes 'till the change is made, never changes  
Nothing ever changes 'till the change is made  
'Till the change is made, 'till the change is made  
Nothing ever changes 'till the change is made

I know what I want  
I've got to move on  
I've seen much better days  
You've been in my life too long  
It's time for us to go our separate ways  
You've been in my life too long

I've seen much better days  
I've got to move on  
In my life, in my life
