

Don't Save Your Breath

The Anix

Double fisted holding back I
Cannot feel a thing
I'm spinning like a freight train
Through the second guesses
That hang over me
The other man in my reflection
Pushes me away
Inhibition can't control him
It doesn't feel the same

Don't save your breath for me
You can't make me stay... with you

Each and every second with you
Winding to an end
Hurricanes of superstition
Weigh me down and
Lift me with regret
Every time you lay your head down
And go to sleep at night
I cannot help but wonder what you
Hide behind your eyes

Don't save your breath for me
You can't make me stay... with you

There's not one good reason to fight through this
Don't want to drag this on forever
So don't call me
Waiting is just a waste

Down... lose control... I want to follow you down
Don't lose control I want to follow you down
Down... lose control... I want to follow you down
Don't lose control I want to follow you down
Don't save your breath for me
You can't make me stay... with you
Don't save your breath for me
You can't make me stay... with you
