

I Saw a Light

The Band Perry

Well I never felt nothing like I did tonight
You had the face of a boy that I met in a dream one time
Some heard it thunder and so did I
I swear it happened when your eyes met mine

Maybe it was just the way the wind blew
Maybe it was God and his Son too
But in that moment I know that I knew
That I, I found you

I saw a light
I heard a bell
You were the very best feeling that I ever felt
And suddenly you are standing here, mine all mine
I saw a light
I saw a light

I still can't believe someone left you laying around
Something precious like you should have already been found

What if I'd stayed home and done nothing tonight
What if you had looked left and I had looked right
For once in our lives we were both on time
And now I found you

I saw a light
I heard a bell
You were the very best feeling that I ever felt
And suddenly you are standing here, mine all mine
I saw a light
I saw a light

Somebody told me when I was younger
Chance is like lightning
Love is like thunder
So I walked right over
Asked for your number
Cause somebody told me when I was younger

I saw a light
I heard a bell
You were the very best feeling that I ever felt
And suddenly you are standing here before my eyes
The thunder in my heart it tells me you are mine
I saw a light
I saw a light
