

Birds And The Bees

The Bird and the Bee

Where, oh where does the water
Come from the mountain
Come from the sea

Search between the angles
Rocks in the rivers
Bring them to me

Where, oh where does the fire
Keep all the fever
More than I need

Sadness turns up to gladness
When everything's burning
You know what I mean

Get into the car to make the light
To go fast, to go slow
To make the light

Don't take shh, crucify it
To breathe in, to breathe out
To kick a habit

Give it all you've got
To do it right, to get it wrong
To get caught

To start another day like yesterday
To start another day like yesterday

Why, oh why do the birds
Do all the flying
It could be me

Taking everything southern
The weather is warmer
Good place to be

Why, oh why do the bees
Need a beekeeper
Let them alone

Taking all of their honey
Isn't it greedy
Leaving them none

Get into the car to make the light
To go fast, to go slow
To make the light

Don't take shh, crucify it
To breathe in, to breathe out
To kick a habit

Give it all you've got
To do it right, to get it wrong

To get caught

To start another day like yesterday
To start another day like yesterday

Where oh
Why oh

Get into the car to make the light
To go fast, to go slow
To make the light

Don't take shh, crucify it
To breathe in, to breathe out
To kick a habit

Give it all you've got
To do it right, to get it wrong
To get caught

To start another day like yesterday
To start another day like yesterday
