## Meteor

## The Bird and the Bee

Heart all around my feet Don't you ever sweep the streets If they still can keep a beat Hands holding other hands I'm a girl and you're a man Do you know what's moving me?

One night a meteor Came to my door And he asked me to dance One night A shooting star He traveled far just to ask me to dance

Arms give away your need Tie them up and around me And play me as you please Dance nothing left to spare Fill it up with all your air You're the one I want to see

One night a meteor Came to my door And he asked me to dance One night A shooting star He traveled far just to ask me to dance

One night a meteor Came to my door And he asked me to dance One night A shooting star He traveled far just to ask me to dance
