

Welcome unto this wretched underworld
Where we the primordial slime we live and breed
We are the ones that time's forgotten
Beneath your revolting heaven rotten
Shapelessly swarming shepherds of disease

Our legions assembling in masses unending

Rats and roaches things that crawl
Bringers of our plague to all
Our millions shall be one
In cess and filth the verminous live on

He who created us did break the mold
A sick evolutions bastard masterpiece
We are the nightmares everlasting
The threshold of your fear surpassing
Soundlessly slithering servants to our king

In death commanding pandemic impending

Rats and roaches things that crawl
Bringers of our plague to all
After fire has scorched his plane
And man-shaped shadows yet remain
Our millions shall be one
In cess and filth the verminous live on
